# A new reality

The mandate to manage sustainability performance is becoming apparent to many companies, yet most face challenges incorporating sustainability

#### Sustainability is a must have

The management must include sustainability in the company's main performance management processes and communicate it to external and internal stakeholders

#### Sustainability as part of your Strategy

Some companies continue to treat sustainability in the background of their business activities and don't include it in their day-to-day decision-making

#### Lack of clarity on legislative requirements

Regulatory ESG reporting requirements are continuously altering and it is important for companies to keep up with those modifications and stay compliant

#### Sustainability goes beyond your organization

An organization's ESG impact is not only measured internally but also up and down the value chain meaning partnerships are required

#### Data collection plays an important role

Standard technology and data management processes are not equipped to measure ESG Metrics gathering this data will become a complex exercise

#### Understanding sustainability

Global economy is currently characterized by rising costs. Some companies don't consider sustainability in their agendas, because they struggle to see the value on investing in sustainability

# Business Services Sustainability Planning
